

Your best decisions deserve better infrastructure

Applied Intelligence for Coral Gables | Every business. Every signal. One map.

Most professionals make high-stakes decisions using scattered notes, gut instinct, and hope. The gap between decision importance and decision process is wide... and there's a better way.

Why smart people make preventable mistakes_

1

Scattered context

Insights live in **7 different tools**, making it hard to see the full picture.

2

No forcing function

It's easy to skip the hard questions when there's no structured process.

3

Memory decay

Critical information known just six months ago is often forgotten or lost.

4

Not portable

Valuable data is locked in proprietary formats, limiting its usability.

5

No accountability

Without clear records, it's impossible to audit or learn from past reasoning.

Portable Knowledge Protocol: A decision framework that travels with you_

Portable

JSON + markdown, works anywhere

Structured

7 required keys force rigor

Domain-agnostic

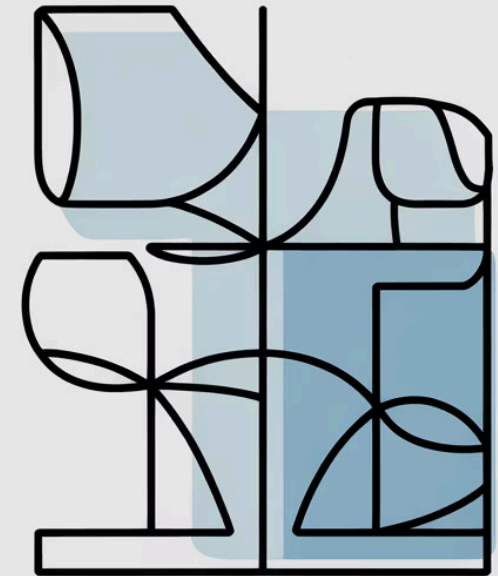

Same framework for investments, hiring, strategy, product

Auditable

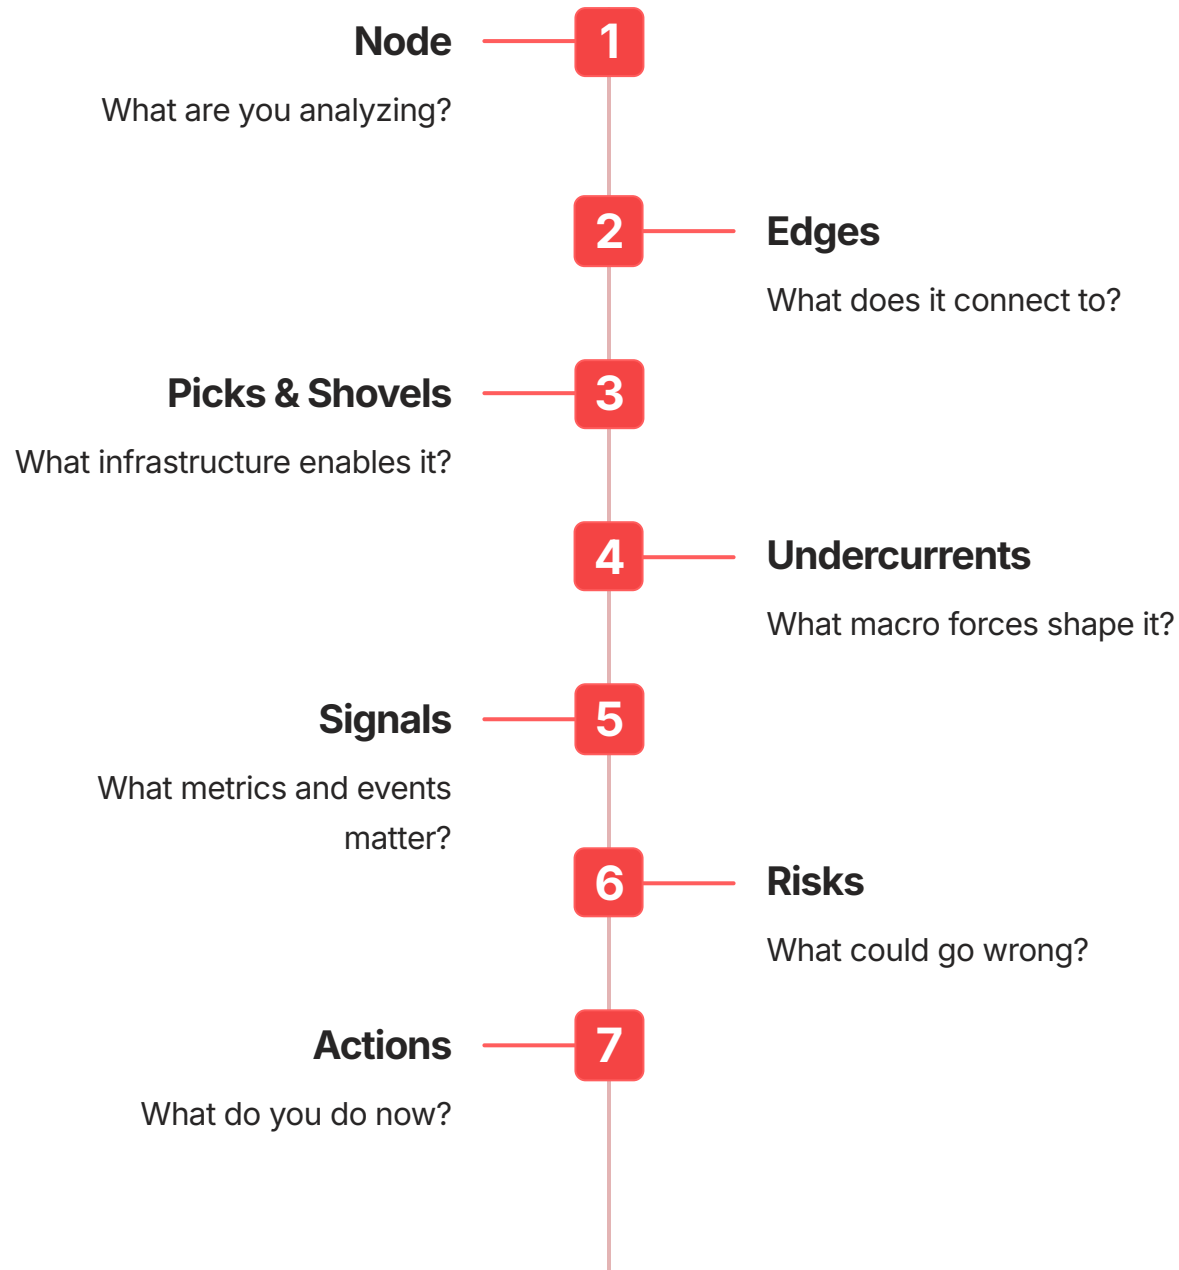

Your reasoning is transparent to future you

Collaborative

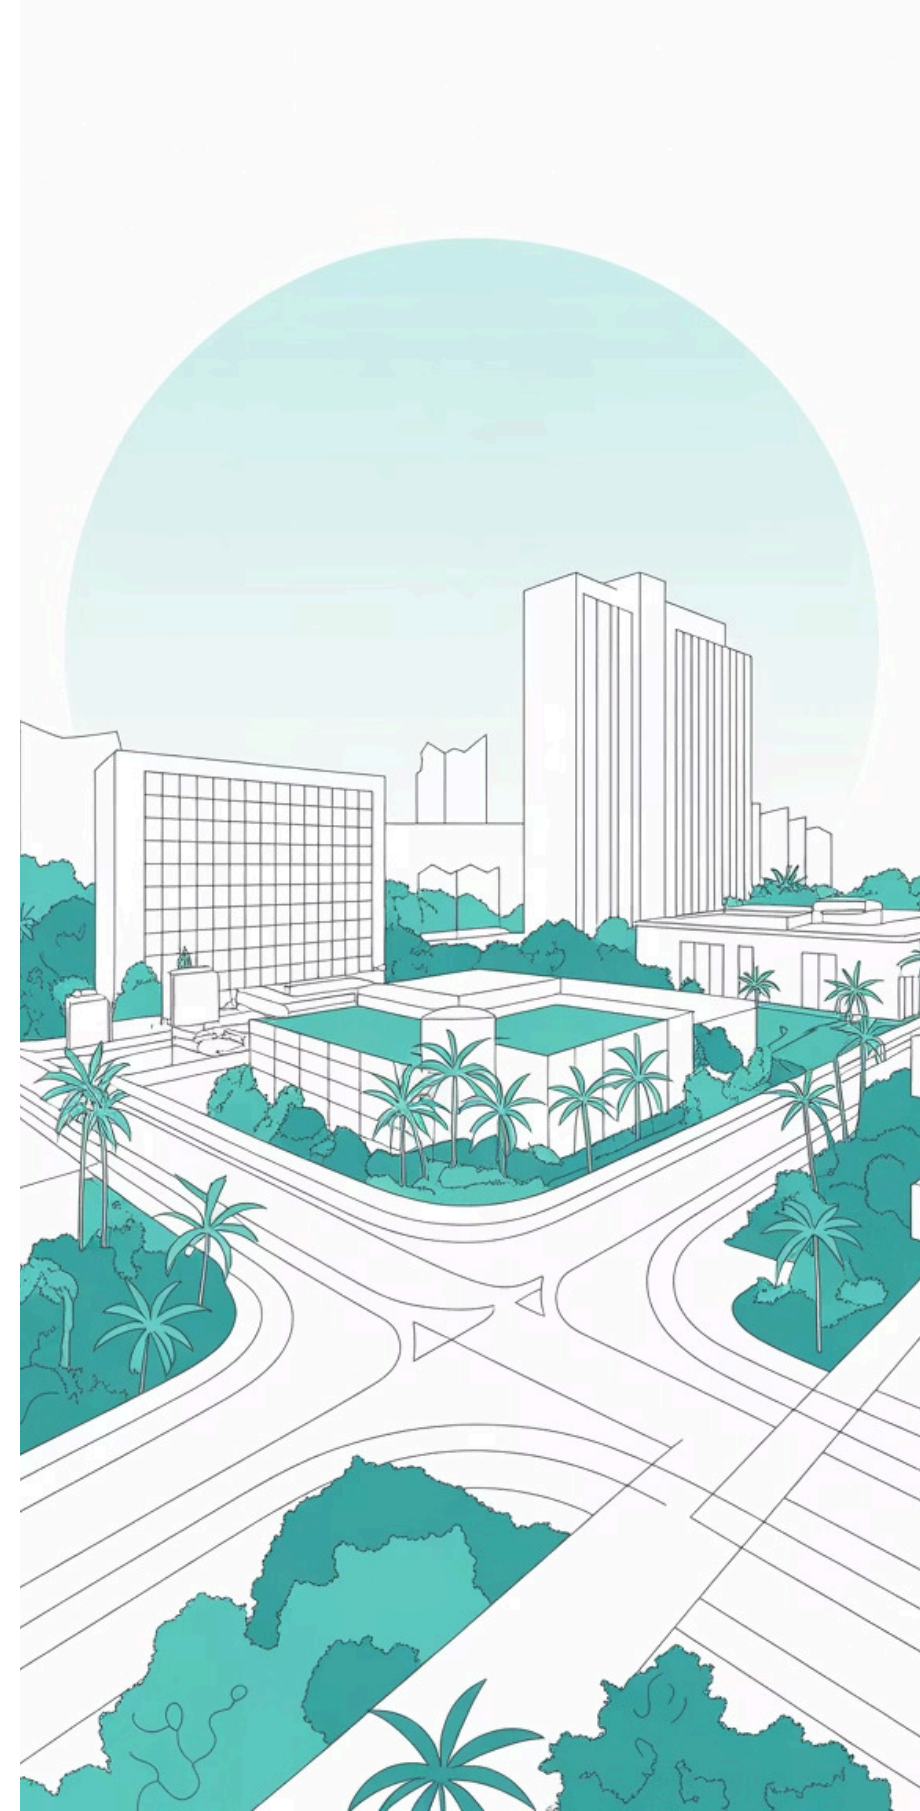

Shared ontology across teams

7 keys that force intellectual honesty_

Every PKP must answer all seven. No shortcuts.

From 'I like this stock' to 'Here's my falsifiable thesis'

Before (typical memo)

Strong growth, good management, buy

No thresholds, no monitoring, no accountability

After (PKP)

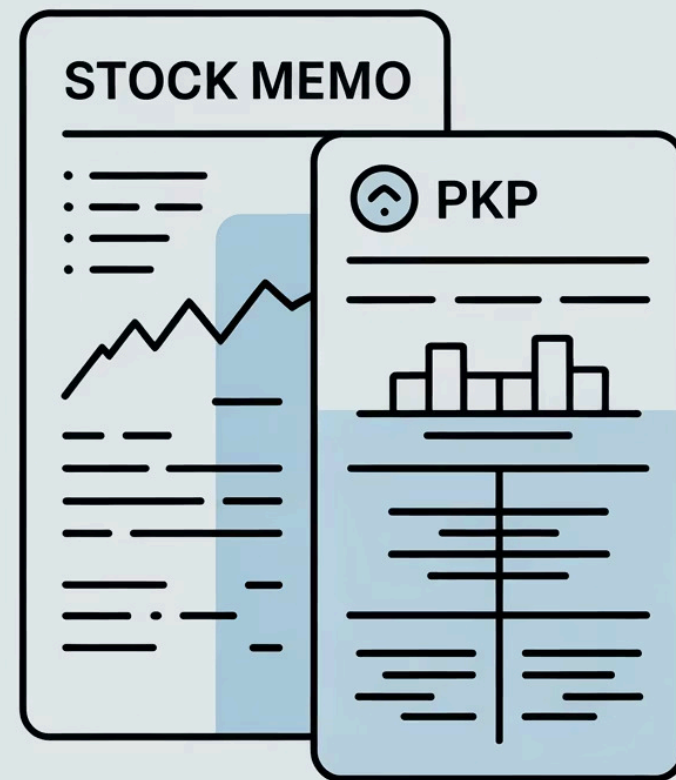

Bull case: 0.78 confidence, \$25 target, +42% upside

Bear case: 0.72 confidence, \$11 target, -35% downside

Monitoring rules: alert if backlog conversion < 25%

Decision gates: re-evaluate if guidance cut

Same decision. 10x more useful.

From 'good culture fit' to measurable hiring outcomes_

0≡≡	0≡≡	0≡≡
0≡-	9≡	≡
⬆	100 100	5%
12.5.	F≡	≡≡≡
6≡	0≡≡	0≡≡

Weighted Competencies

Storytelling 40%, Technical 30%, Business 30%

Clear Thresholds

Advance if score ≥ 78 AND all dimensions ≥ 65

Bias Controls

Monitor interviewer variance, adverse impact ratios

Validation Loop

Track Quality of Hire at 90d and 180d

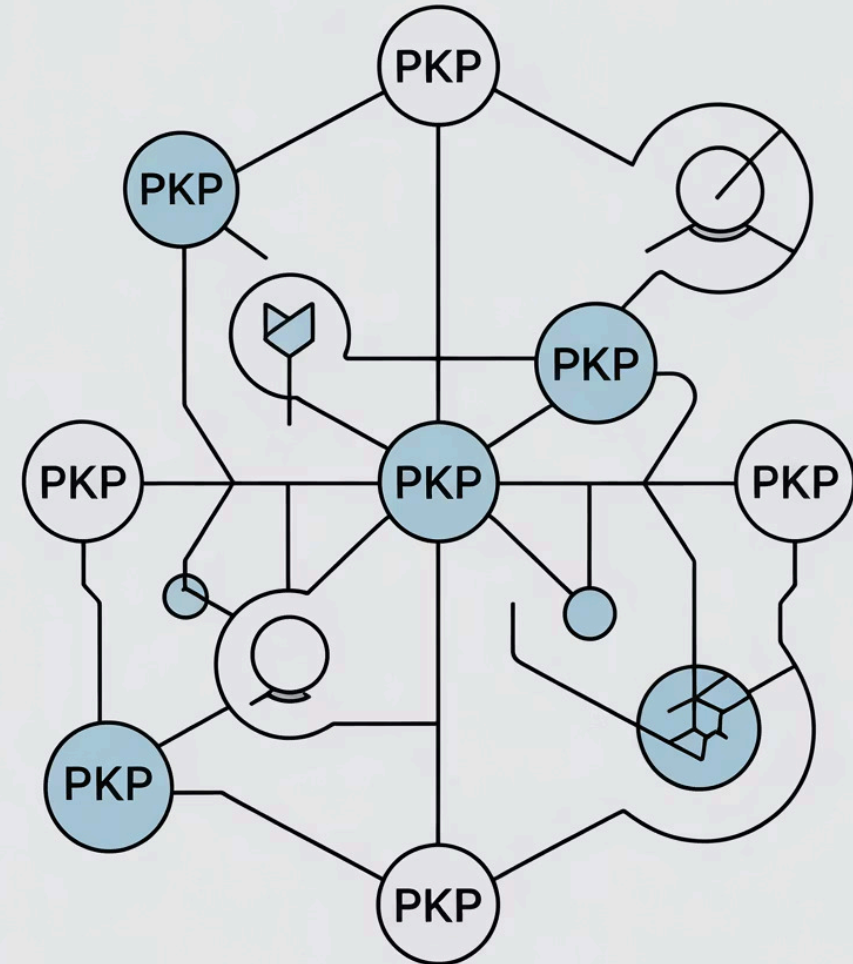

Hiring becomes a system, not a mood.

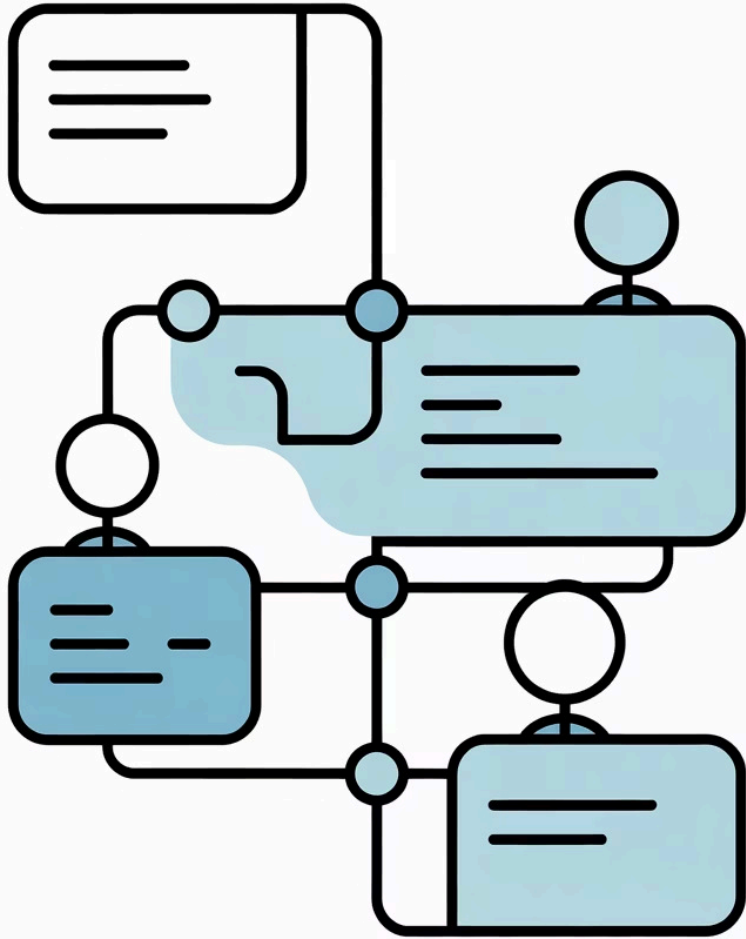

One framework, infinite applications_

PKP has been used for:

- | | |
|--|--|
| 1 Capital markets — equity analysis (SOUN, Carnival) | 2 Real estate — ZIP-as-stock investment scoring |
| 3 Policy — EU AI Act compliance mapping | 4 Product analytics — streaming media survival curves |
| 5 Talent — structured hiring and competency assessment | 6 Strategy — competitive positioning and market analysis |

Learn once, apply everywhere.

Your past decisions become future competitive advantage_

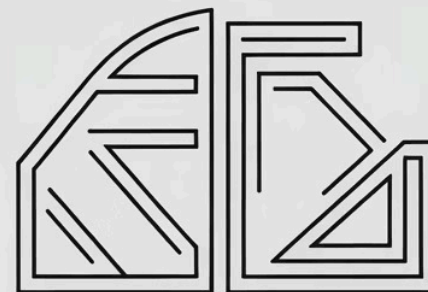

- **Pattern recognition** — see your recurring blind spots
- **Calibration** — measure your accuracy over time
- **Knowledge graph** — decisions link and inform each other
- **Organizational memory** — onboard new team members in hours, not months
- **AI-ready** — structured data feeds better prompts and agents

Every PKP makes the next one better.

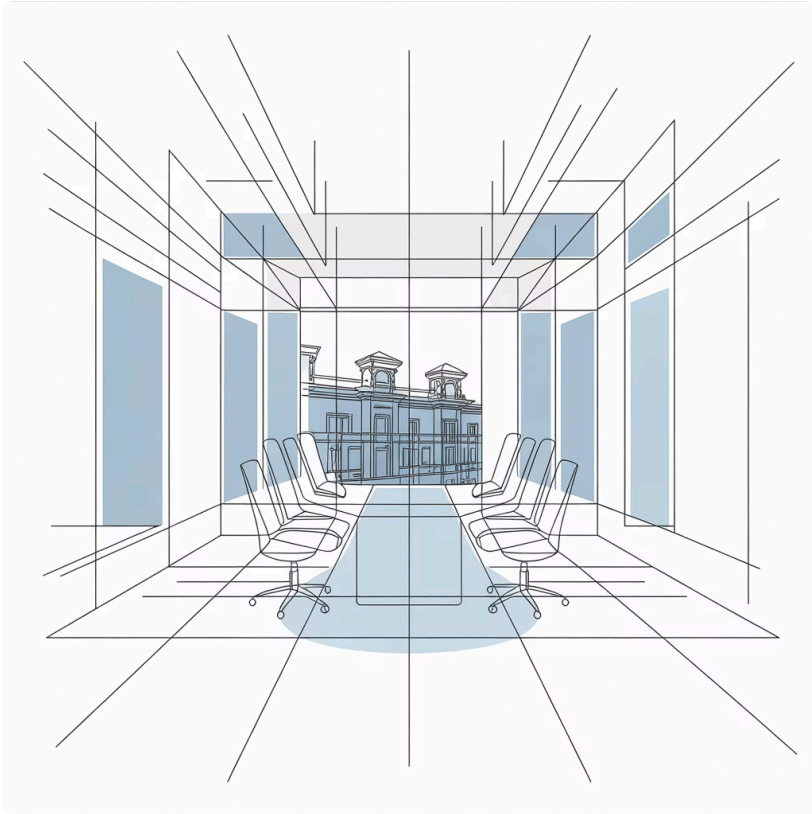

Start small, scale fast_

The framework is simple. The leverage is exponential.

Let's Build Your Intelligence Layer_

Who This Serves

Real estate agents tracking market movements. Local SMB founders seeking competitive advantage. Marketing agencies pitching with precision. Chambers and economic development organizations monitoring their ecosystem.

Law firms, banks, and PE funds evaluating opportunities. Universities and institutions building local knowledge infrastructure. Anyone who makes decisions in Coral Gables and wants to see clearly.
